

Project Demo Planning

Date	29 September 2026
Team ID	SWTID-2026-1876
Project Name	AI BlogNest API
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the AI BlogNest API effectively, covering the backend architecture, secure authentication, blog management, database integration, AI-powered features, and API testing in a clear and organized manner. The demonstration follows the project flow documented for the AI BlogNest API.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce AI BlogNest API and explain the purpose of developing a structured backend API for a blog application.	2	Team
2	Solution Overview	Explain the Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt and Gemini AI based architecture and system flow.	3	Team
3	User Authentication	Demonstrate user registration, login, password protection using bcrypt, JWT authentication and protected API access.	3	Team
4	Blog & AI Features	Demonstrate blog creation and management, AI-powered blog generation and AI-powered blog summarization using Gemini AI.	4	Team
5	Database & API Testing	Show MongoDB data handling and test the REST APIs using Thunder Client, including API responses and error handling.	3	Team
6	Q&A; and Conclusion	Summarize the implemented features, explain the project outcome and answer questions about the demonstrated solution.	2	Team

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce AI BlogNest API and the blog backend problem addressed by the project.
2	Solution Overview	Explain the modular backend architecture and the flow from client request through routes, middleware, controllers/services and MongoDB or Gemini AI.
3	Live Feature Demonstration	Demonstrate authentication, blog management, AI blog generation, AI summarization and API responses using Thunder Client.
4	Q&A; Session	Answer questions about the project features, technologies, database, authentication and AI integration.
